EDUCATION

Universidad del Valle de Guatemala (UVG) | Guatemala

B.S. in Data Science **Jan 2022 – July 2026**

Bachelor of Science in Engineering **Exp. May 2027**

- **GPA:** 97.38 / 100
- **Potencia-T Scholar:** Awarded a highly competitive 30% merit-based scholarship, ranking among the top 3% of applicants (30/1,000+) based on entrance examinations (1300+ PAA) and leadership potential.
- **Academic Merit Award (2022–2025):** Annual institutional honors for sustaining a cumulative academic average above 95/100.
- **Entrepreneurial Thesis (GradVenture)** – Co-Founder & Technical Lead, DAIA (daia.com.gt)
  - Engineered an end-to-end Business Intelligence SaaS platform integrating automated data pipelines, SQL relational databases, interactive dashboards, KPI tracking, and deployed machine learning models into a functional web application.
  - Conducted customer discovery and field validation across target businesses, translating operational pain points into product requirements to iteratively optimize architecture and business strategy.

Additional Certifications: Data Analyst Track, DataCamp (2024)

PROFESSIONAL EXPERIENCE

Solidaridad | *IT & Data Management Consultant (Junior)* **May 2026 – Present**

- Appointed to deliver regional operational technical assistance across Central America via deep-dive analytical reporting and interactive monitoring tools.
- Executed systematic data cleaning, normalization, and integrity validation on institutional relational databases to guarantee data fidelity for strategic project evaluation.
- Automated repetitive operational tasks via custom scripting and deployed baseline Machine Learning models for trend analysis and predictive indicator forecasting.
- Built real-time Looker Studio dashboards tracking project KPIs to inform decision-making for executive stakeholders and international funding bodies.
- Integrated full-stack operational solutions utilizing Python and the Google Workspace developer ecosystem.

SOPHOS | *Data Science & BI Intern* **May 2025 – Jan 2026**

- Architected and developed 4 prototype machine learning models (Demand Forecasting, Recommender Systems, Price Optimization, and Customer Churn) directly aimed at driving commercial revenue.
- Formulated 6+ interactive Streamlit dashboards monitoring sales traffic and performance metrics; selected to present strategic data insights directly to the CEO/Owner.
- Designed a centralized SQL metric store comprising 30+ versioned tables to standardize performance reporting and data lineage.

Comisión Nacional de Energía Eléctrica (CNEE) | *Wholesale Market Data Analyst* **June 2025 – Dec 2025**

- Engineered and maintained 12 interactive Tableau dashboards monitoring national grid operations, including variable cost distribution, regional electricity consumption, and renewable generation.
- Processed high-dimensional daily market logs (workbooks spanning 30+ tabs and 3,000+ columns), using extraction pipelines via Perl, Python, and R, writing additional scripts as needed and markedly reducing manual processing overhead.
- Centralized fragmented legacy data stores into a unified relational database, expanding data accessibility and query efficiency for the Planning & Market department.

ACADEMIC LEADERSHIP & TEACHING

Universidad del Valle de Guatemala | *Teaching Assistant* **Jan 2024 – Present**

- Appointed by the Departments of Mathematics and Computer Science to instruct and grade 30+ students per term across rigorous foundational courses: Real Analysis, Analysis & Design of Algorithms, Data Science, and Advanced Linear Algebra.
- Mentored undergraduates through proof construction and algorithmic complexity during problem-solving recitations, providing detailed rubric-based technical feedback to reinforce retention.

Universidad del Valle de Guatemala | *Pre-Calculus Tutor* **Jan 2023 – Nov 2023**

- Coached first-year engineering cohorts in foundational mathematics to bridge secondary-to-undergraduate curricular transitions as part of the Potencia-T scholarship service initiative.

TECHNICAL SKILLS & LANGUAGES

- **Languages & Core Tools:** Python (for example Pandas, Scikit-learn), R, SQL, Java, LaTeX.
- **BI & Data Engineering:** Tableau, Looker Studio, Power BI, Streamlit, Git, Relational Database Design, ETL Pipelines.
- **Spoken Languages**: Spanish (Native), English (C2 – TOEFL iBT 118/120), German (C1 – DSDII), Hebrew (B1 – Level 7), French (B2 – In progress).

EXTRACURRICULARS & RESEARCH INTERESTS

- **Service**: Staff Volunteer, Ada Lovelace Day 2025 & 2026 (advancing women's representation in STEM).
- **Personal Interests:** Acrylic painting (featured in *Mano Amiga* exhibition, 2014–Present); piano.
